Operational Excellence using Service Management Standards & Guidelines(ITIL) ®

Operational efficiency and effectiveness in the business environment requires a keen understanding of the complex nature and interactions among software, hardware and personnel. Organizations can approach the challenge through Service Management Processes that can help define, integrate and manage as many processes with a repeatable pattern of execution or flow as possible.

Today's complex IT systems contain more consonants and variables than any single human mind can process and comprehend. Nbiz Infosol uses a phased approach to create a lifecycle to automate service management processes.

Project management

Project Management, as an independent discipline, has been gaining increasing recognition as a critical differentiator for better business performance. Nbiz Infosol helps organizations to execute, govern and measure their portfolios

Resource Augmentation

With decades of IT implementation experience, Nbiz Infosol provides value-added, high-impact recruitment process outsourcing services. Our collaborative relationship model helps shorten the recruitment cycle for high-quality professionals, which is critical to dynamically changing business needs.
